

BCNI Symposium 2023

Novel Blood Cancer Treatments - Beyond Genomics

8th September 2023
Dublin

Hilton, Kilmainham

Programme

Time	Speaker	Title
9:00 - 9:30	Registration and poster hanging	
9:30 - 9:35	Eva Szegezdi <i>University of Galway, Galway, Ireland</i>	Welcome note
9:35 - 10:05	Jennifer O'Sullivan <i>University of Oxford, Oxford, UK</i>	Understanding splicing in accelerating disease progression in myeloproliferative neoplasms
10:05 - 10:35	Marta Serafini <i>Tettamanti Center, Fondazione IRCCS San Gerardo dei Tintori, Monza, Italy</i>	The leukemic immune microenvironment and tailored CAR therapies
10:35 - 10:45	TBC: Hayley Foy-Stones <i>St. James's Hospital, Dublin, Ireland</i>	Serial monitoring of circulating CD19 CAR-T cells in patients post CAR-T cell therapy
10:45 - 10:55	TBC: Soumyadipta Kundu <i>Univeristy of Galway, Ireland</i>	Enhancing the Cytotoxicity of Natural Killer cells on Non-Hodgkin's Lymphoma using SMAC mimetics
10:55 - 11:30	COFFEE BREAK	
11:30 - 12:00	Nicolas Dulphy <i>INSERM, Paris, France</i>	Intrinsic Defects for NK-cell-mediated Immunosurveillance in Myelodysplastic Syndromes
12:00 - 12:30	Ian Overton <i>Queens University Belfast, UK</i>	Deep Interrogation of Multiomics Data to Discover 'Achilles Heels' and Context-specific Gene Function, Towards More Effective Therapy for Multiple Myeloma
12:30 - 13:00	Caroline Heckman <i>University of Helsinki, Helsinki, Finland</i>	Functional precision medicine for high-risk AML
13:00 - 14:15	LUNCH BREAK	
14:15 - 14:45	Tom Cupedo <i>Erasmus Cancer Institute, Rotterdam, The Netherlands</i>	Stromal - immune interactions driving bone marrow inflammation in multiple myeloma
14:45 - 15:15	Adrian Bracken <i>Trinity College Dublin, Dublin, Ireland</i>	Unravelling Genetic Dependencies in Haematological Malignancies Driven by the EZH2 Oncogene
15:15 - 15:55	Irene Ghobrial <i>Dana-Farber Cancer Institute Harvard Institute of Medicine, Boston, USA</i>	Immunosuppression in multiple myeloma
15:55 - 16:05	TBC: Izabela Drozd	Development of a novel xenograft model of Multiple Myeloma on the chick embryo chorioallantoic membrane

	RCSI University of Medicine and Health Sciences Beaumont Hospital, Dublin, Ireland	
16:05 – 16:15	TBC: Leonie Durkan University of Galway, Ireland	Investigating the effect of osteoblasts on natural killer cell cytotoxicity against acute myeloid leukaemia in vitro
16:15	Close of meeting
